

Regenerating Coastal Communities

BlueFish Regeneration Ltd

Tel: 01904 520109

Experience

BlueFish is a leading specialist in coastal regeneration. It empathises with coastal communities seeking to reinvent themselves, and understands their challenges.

This York-based company, a member of the British Urban Regeneration Association Seaside Network, helps to create thriving towns for long-term sustainability.

Working closely with local authorities and development agencies, BlueFish enables coastal communities to move with the times, while preserving heritage and character. It ensures coastal communities get from where they are to where they want to be.

A BlueFish regeneration plan is the foundation to securing any coastal community's future prosperity.

Expertise

BlueFish is a consultancy with a difference. It develops and delivers complete solutions, matching client needs with trusted associates (profiled on its website). Its MD, Imelda Havers, has vast commercial and public sector experience and brings together the best in the business.

Economic regeneration expert Gordon Hood has noteworthy seaside regeneration skills, and impressive property market and development knowledge. Architectural consultant and development adviser Peter Hunter has worked on many waterside area developments, and was pivotal to the Salford Quays flagship development.

Effectiveness

Lasting regeneration is a challenge. BlueFish re-establishes access to, and interest in, coastal destinations. It links seaside areas to rural hinterlands, bringing benefits to both. It enhances assets, increases opportunities, secures funding.

BlueFish will help you achieve your regeneration objectives. Its input at any level adds value; its objectivity identifies the right course from planning to completion. **Find out how through a no-obligation, free consultation.**
